Omschrijving

Maximum sitting comfort for Tractors of medium and heavy weight.

The Maximo Evolution Dynamic is equipped with an active seat climatisation, which carries away the body perspiration.The driver sits pleasantly tempered with dry back and bottom.

Sensors and electronics for active weight adjustment are applied in a tractor seat for the first time.

The fully automatic adjustment to the driver’s weight guarantees relaxed and healthy sitting while at work.

Easy to handle: The Maximo Evolution Dynamic convinces by its user-friendly design. The operating elements communicate their function and operating direction to the user by their form. All handles are located in such a way to be found intuitively.

The seat can be brought into the individual ergonomic sitting position without any previous knowledge.
